GET THERE FASTER – FOR LESS MONEY AND WITH GREATER LEGAL CERTAINTY

The common CIM/SMGS consignment note is seeing success: this modern instrument is being used for more and more shipments in the Russian region between Western Europe, Russia and China. And with good reason: the common CIM/SMGS consignment note saves costs and time. Read on for more details.

The economics of Eastern Europe, Russia and Asia – and China in particular – are dynamic and are growing. As a result, the exchange of goods between Europe, Russia and Asia is on the increase. Rail could handle a much larger percentage of this tonnage of freight traffic between the East and the West and vice versa. All the more reason to improve the conditions for rail transport – and to improve them as quickly as possible! The corridors are in place. And so is the common CIM/SMGS consignment note!
